***All vehicles must stay on Main Roads***

If you are unsure about your intended route, ask a Wrigley staff member.

Coves on the west end of the island (Howlands, Emerald, Cherry, & Fourth of July) are PRIVATE PROPERTY; you will need prior approval before traveling here. For a list of who to contact, see backside of this map.

NOTE: smart phone mapping applications are not reliable on the island.
General guidelines for access to private coves/camps on Catalina:

Before visiting any of the private coves on Catalina Island, you should plan to receive prior approval from the property or properties. Property owners will want to know (1) what you hope to do there and (2) when you plan to be on-site. Typically, for protection of youth and minors, access to coves is restricted when program is in session.

For drone flights associated with research activities, be aware that the coves are on Catalina Conservancy and/or Catalina Island Company property and would default to their parent company’s drone policy.

On-Site Contacts:

- **Fourth of July** (Catalina Island Company property)
